

Owner's Manual

Your Gym Management System

A simple, step-by-step guide to running your gym
— no technical experience needed.

Gym: _____

Your admin website: _____/admin

Powered by MuleSoo Digital Solutions

What's inside

1. Welcome — what your system does for you
2. Logging in (your admin website)
3. Your dashboard at a glance
4. Checking members in at the door
5. Face & QR scan access
6. Finding & managing members
7. Registering a walk-in member
8. Today's overview — who's in the gym
9. Classes — create & manage
10. Class bookings & waitlists
11. Trainers
12. Payments & money
13. Analytics & reports
14. Calendar & events
15. Messaging your members
16. Your plans & prices (Catalog)
17. Settings — your brand & rules
18. QR codes — print & display
19. Visitors & day passes
20. Incident log
21. What your members experience
22. Staff accounts & roles
23. Alerts you'll receive
24. Tips, FAQ & support

Congratulations on your new gym management system! It replaces paperwork, manual payment chasing, and spreadsheets with one simple online tool that works 24/7.

What it does for you

- Signs up new members from a QR code — including health screening, plan choice and payment.
- Verifies members at your door in seconds and logs every visit.
- Collects monthly payments automatically and sends receipts.
- Manages classes, bookings, trainers and your whole member database.
- Sends you instant alerts for new members, payments and more.

You don't need to be techy

Everything in this manual is done by clicking and typing on your admin website. If you can use WhatsApp, you can use this.

Your system has two parts: the MEMBER side (what your clients see) and the ADMIN side (your control panel). This manual is about the admin side.

1. Open your admin website address in any browser, then add /admin/login to the end.
2. Enter the username and password we gave you at handover.
3. Click Sign in. You'll land on your Dashboard.

Keep it safe

Never share your owner login. We can set up separate logins for your staff (see section 22). Your session signs out automatically after a while for security. You can change your password in Settings - Change Password (section 17); if you forget it, contact support to reset.

Tip: bookmark the /admin page on your phone and reception computer for one-tap access.

Your dashboard at a glance

The Dashboard is your morning coffee screen — a quick health check of the gym.

What you'll see

- Today's check-ins, new members (today/week/month), active members, and revenue.
- Upcoming classes and their booking status.
- A recent activity feed of the latest events.

Alert banners — act on these

- Failed payments needing attention.
- Members flagged for medical clearance (PAR-Q).
- Memberships expiring in 7 days.
- Classes nearly full, and new sign-ups since you last logged in.

Your daily 2-minute routine

1) Open the Dashboard and clear any alert banners (failed payments, expiring memberships, PAR-Q flags). 2) Glance at today's classes and check-ins. 3) Use the Scan or Verify screen through the day as members arrive. That's it — the system handles billing, reminders and receipts automatically.

Use the left menu

Every section in this manual is a link in the menu on the left (Verify, Members, Classes, Payments, etc.).
On a phone, tap the &0 menu icon.

4

Checking members in at the door

This is your most-used screen each day. Open "Verify" from the menu.

1. Ask the member for their verification code or membership number (or scan their QR/ID).
2. Type or scan it into the big box and press Enter.

What you'll see:

GREEN — Access granted	Shows their photo, name, tier, valid-until date, payment status and any medical flag. The visit is logged automatically.
RED — Access denied	Shows only the reason (expired, suspended, not found). No personal details are shown. Direct them to reception.

Why it's safe

Denied scans never reveal personal information — protecting your members' privacy and your POPIA compliance.

Open "Scan" for fast, hands-free entry. There are THREE ways to identify a person, so you are never stuck at the door:

1. FACE — point the camera at the member; the system takes several quick readings, averages them, and matches. This multi-reading approach is reliable even with changeable conditions (a just-washed/shiny face, dim light, or a slight angle).
2. QR — switch to QR mode and scan the member's or trainer's personal QR code.
3. CODE — if a face is not recognised, a box appears: simply type the person's verification code or membership number and it identifies them instantly (works for members and trainers).

On a match the screen shows access granted/denied and starts the visit timer; on check-out it logs how long they stayed. Denied scans never reveal personal details (POPIA).

Enrolling faces (do this once per person)

- Members capture their face during registration, or you can capture it at reception.
- Staff and trainers capture their face when you register them (Staff & Roles / Trainers).
- For your own admin face-login, use Settings! Admin Face Login.

Best recognition

Capture in good, even lighting with a steady, front-on face. After any system update, ask people to re-capture once for the strongest match. The camera asks for permission the first time on each device — tap Allow.

6 Finding & managing members

Open "Members" to search your whole database by name, membership number, phone, email or ID. Filter by status, membership tier, contract length, or show only members with a medical (PAR-Q) flag.

Inside a member's profile

- Personal details, health screening (PAR-Q), goals and experience.
- Membership history, payment history, attendance and class bookings.
- Add-on services and a staff notes box.

Quick actions

Suspend / reactivate	Block or restore a member's access instantly.
Renew / change plan	Update their membership or tier.
Add a note	Record anything staff should know.
New verification code	Re-issue an access code if needed.
Manual check-in	Log a visit by hand.

Deleting a member

Only the owner can permanently delete a member (POPIA right to erasure). This removes all their data and cannot be undone.

Registering a walk-in member

For someone signing up at reception, open "Register member" — it's the same flow your members use online, completed by your staff.

1. Fill in their personal details and complete the PAR-Q health questions together.
2. Choose their membership plan and any add-ons.
3. Take payment by card (Paystack) or mark it as paid by cash/EFT.
4. Their membership card PDF is generated to print or email.

Tip

Walk-ins are tagged "manually registered" so you can tell online vs in-person sign-ups apart in your reports.

Today's overview — who's in the gym

Open "Today" to see live activity for the current day.

- Everyone who has checked in today, with their arrival time.
- Who is currently inside (checked in, not yet checked out).
- Today's class schedule with booked vs available spots.
- A quick check-in button for reception.

Great for safety

In an emergency, "currently inside" tells you exactly who is in the building.

Open "Classes" to set up your timetable. For each class you set:

- Class name and the trainer who runs it.
- Day & time (weekly recurring or a one-off date) and duration.
- Maximum capacity (and a minimum, below which you may cancel).
- Whether booking is required, and which membership tiers may attend.

Managing a class

- Edit or delete any class at any time.
- See who is booked, and message all booked members.
- Cancel a class — booked members are notified automatically.

Members book classes from their phone. The system handles the rest:

- Capacity is enforced automatically — no overbooking.
- When a class is full, the next member joins a WAITLIST and is told their position.
- If someone cancels, the system can move a waitlisted member into the spot and notify them.
- Late cancellations (under 2 hours) are flagged.

Reminders are automatic

Booked members get a class reminder, so you don't have to chase anyone.

Open "Trainers" to manage your team.

- Add each trainer with their contact details, specialisation and certifications.
- Capture the trainer's face and photo — they instantly get a Trainer ID card (PNG) + PDF with a trainer number, verification code and a scan-to-verify QR.
- Assign trainers to classes.
- Trainers can log workout notes against their clients' personal-training sessions.

Trainer logins

A trainer can be given their own login (we set this up for you) that shows only their own clients — see section 22.

Open "Payments" to see every transaction: received, pending, failed and refunded. Filter by member, date, type or tier.

What you can do

- Record a cash or EFT payment by hand.
- See failed payments and their retry status.
- Export everything to a CSV file for your accountant.

Automatic billing

- Monthly fees are collected automatically on each member's billing date (if card payment is set up).
- A failed payment is retried; after repeated failures the member is suspended and you're alerted.

Your money, your account

Member payments go directly into your own Paystack account — never through anyone else.

Open "Analytics" for headline numbers (active members, new in 30 days, lapsed, churn rate) plus clear bar charts for:

- Check-ins over the last 30 days, and your busiest hours of the day.
- Most popular classes (by bookings, last 30 days).
- Revenue trend over the last 6 months.
- Membership tier distribution and member status mix.
- Medical-aid breakdown — how many members have medical aid, by provider.

Use it monthly

A quick look each month tells you what's working. For QR sign-up conversion, see the QR Codes page (section 18).

Open "Calendar" to see all classes and events in one view, colour-coded by type.

- Add special events or promotions.
- Block out days (public holidays, maintenance).
- Jump to any date to see the full schedule.

Messaging your members

Open "Communications" to email groups of members at once — perfect for promotions and announcements.

1. Choose who to send to (e.g. all members, a specific tier, or a status).
2. Write your subject and message.
3. Send — the system emails everyone and records it.

Note

Bulk messages to members go by email. Instant WhatsApp/Telegram alerts are for you, the owner.

Your plans & prices (Catalog)

Open "Catalog" to control exactly what you sell. No developer needed.

- Add, edit, enable or disable membership plans.
- Set prices, joining fees, included classes and benefits.
- Mark a plan as "most popular" to highlight it.
- Manage add-on services (personal training, classes, lockers, etc.) and their prices.

Changes are instant

Whatever you set here is what new members see in the sign-up flow immediately.

Open "Settings" (owner only) to configure your gym. Edit each section and click Save.

Gym Profile	Name, tagline, accent colour, contact details, hours, welcome message.
Owner Notifications	Where your instant alerts are sent (WhatsApp/Telegram/email).
Contract Discounts	Discounts for longer commitments.
Access & Compliance	Capacity, session length, peak hours, what each tier may do.
Legal text	Gym rules, indemnity waiver, membership contract, POPIA policy.
Change Password	Update the password for your own admin login (minimum 8 characters).
Admin Face Login	Enrol your face to unlock the admin by scan.

Everything is pre-filled

Professional, compliant defaults are already there. Just review, tweak to match your gym, and Save.

Open "QR Codes" to download and print your codes. Each has a Download PNG button and a Print button:

- NEW MEMBER code — opens the sign-up flow. Put it on your door, flyers and social media.
- EXISTING MEMBER code — opens the member portal for check-in and bookings.
- A Company code (general landing page) and a secure Admin code are also provided.

This page also shows your scan analytics: total scans, new-member scans, and your scan-to-registration conversion rate.

Display them well

Print large, clear copies at the entrance and reception. The easier they are to scan, the more sign-ups you get.

Open "Visitors" to manage guests and day-pass holders.

1. Issue a day pass with a name (and optional host) — a pass code is generated.
2. See today's visitors and mark them as checked in.

Good for guests

Lets friends and trial visitors in without creating a full membership.

Open "Incidents" to record anything that happens on site — an injury, a dispute, a security issue.

- Log an incident against a member or an unidentified person, with a note.
- You (the owner) get an instant alert, and the log is kept for your records.

Protect your business

A clear, time-stamped incident record is valuable for insurance and any disputes.

What your members experience

It helps to know what your clients see, so you can guide them:

1. They scan your NEW MEMBER QR and are guided through sign-up: details, health check, plan, payment.
2. They instantly receive a membership number, a verification code, a welcome email and a membership card PDF.
3. They scan the EXISTING MEMBER QR (or use the member portal) to check in, book or cancel classes, view their history and membership card, and pay any balance owed securely online.

Self-service = less work for you

Most member admin happens on their phone, freeing your staff for real service.

Give each staff member their own login with the right level of access. Roles:

Owner	Full access, including Settings. (That's you.)
Manager	Everything except Settings.
Reception	Verify, scan, today, register walk-ins, visitors, incidents.
Trainer	Sees only their own clients.

Self-service

As the owner, register staff yourself in Staff & Roles: enter their details, capture a face scan + photo, and they instantly get a login, a Staff ID card + PDF (with staff number, verification code and verify QR), and face access — just like members. You can also change roles, enable/disable, and reset passwords.

Tip: the Audit Log (owner/manager) records important staff actions — status changes, deletions, refunds, settings and staff edits — so you always know who did what.

Alerts you'll receive

The system keeps you informed automatically via WhatsApp/Telegram/email (set in Settings):

- New member registered.
- Payment received, and payment failed.
- Membership expiring or lapsed.
- Medical-clearance flag on a new member.
- Capacity getting high, incidents, and a daily summary each evening.

Tune them

You can turn alert types on or off in Settings so you only get what matters to you.

Quick tips

- Check your Dashboard and alert banners each morning.
- Keep your plans/prices current in Catalog.
- Display your QR codes prominently — they drive sign-ups.

FAQ

A member can't check in	Search them in Members — check status (expired/suspended) and payment.
Payment didn't go through	See Payments !' failed; the system retries automatically.
Change my password	Settings - Change Password. If forgotten, contact support to reset.
Camera won't scan	Allow camera permission and ensure good lighting.
Need to change a price	Catalog !' edit the plan !' Save (instant).
